

ASCAPE Newsletter Issue 4 July 2022

Dear audience, this is a special issue of [ASCAPE](#) newsletter dedicated to the Open Call projects that have been selected among several candidates. On the same time you be informed on ASCAPE's latest activities such as outcomes, milestones reached, news & events! To stay always up-to-date and discover more about us, you walk through our website or follow us on [Twitter](#), [Facebook](#), [LinkedIn](#), [YouTube](#).

Let us introduce you to ImmuneAI!

It stands for "Artificial Intelligence in serve of Immunotherapy: Prediction of quality of life, and financial toxicity profile". ImmuneAI wants to 'reveal' the patients with the greatest survival benefit with immunotherapy and define the safety and QoL profiles of the same patients. [Discover more...](#)

Have you met ASME?

It stands for "Artificial Intelligence Supporting MELanoma survivors across Europe". To address melanoma challenges ASME proceeds towards monitoring and predicting the course of disease progression and improving patient outcomes via AI-enabled evidence-based decision support to their doctors. ASME will focus on markers that can predict the possibility of developing side effects as well as the progression of melanoma during adjuvant therapy. [Discover more...](#)

What does "Dual Clinical Evaluation of the ASCAPE Framework" mean to you?

For ASCAPE it means a lot! It is an open Call that will facilitate the adoption of AI technologies in the context of a study to be conducted in a real clinical context. DCEAF researchers will conduct a study during which patients will be asked to provide information on their Quality-of-Life issues by involving breast and colon cancer patients. [Discover more...](#)

Latest Events
